

3.1. - 3.3 Macromolecules

Constructed using Crossword Weaver

ACROSS

- 1 The chain of carbon atoms in an organic molecule.
- 9 Nitrogen atom bonded to two hydrogen atoms.
- 12 Removal of water, digestion of polymers into their monomer
- 13 Large biological molecules.
- 16 A carbon atom linked to w double bonded oxygen atom.
- 17 Small organic molecules bonded into chains.

DOWN

- 2 Carbon Based Molecules
- 3 Links monomers together to form polymers.
- 4 Water fearing
- 5 Hydrogen atom bonded to an oxygen atom (OH).
- 6 The groups of atoms that usually participate in chemical reactions.
- 7 Compounds that contain carboxyl groups.
- 8 Methane and other compounds composed of only carbon and hydrogen.
- 10 Phosphorus atom bonded to four oxygen atoms.
- 11 Water loving.
- 14 The units that serve as the building blocks of polymers.
- 15 Compounds with the same formula but different structure.
